Tropical

Creating more with Evanthia

Since 2013 Evanthia is a strong brand with a clear focus on breeding, propagation, seed production of ornamentals for growers of cut flowers, pot and bedding plants and tropical plants. We would like to introduce you to our latest product range.

Evanthia Young Plants from Seeds

Partners in various parts of the world supply us with a large assortment of tropical seeds of carefully selected plants, suitable for use as (mostly) indoor decoration. In addition to the supply of tropical seeds we also have a nice assortment of tropical young plants grown from seed that we supply in different tray sizes.

Evanthia Young Plants from Tissue Culture

New in our range are young plants from tissue culture. We have access to many laboratories around the world to provide us the best starting material. With this addition to our assortment we hope to offer you plants that meet your needs.

We offer you starting material that meets the highest trade requirements, working efficiently in order to give you fast and flexible service.

We wish you a lot of growth, in collaboration with Evanthia.

Nico Grootendorst

Managing Director

**"Opportunities don't happen.
You create them."**

Seed Technology

We have modern facilities for breeding and propagation of seeds. High tech equipment is available for seed cleaning, processing, precision coating and pelleting. Germination tests under various conditions are done in our own laboratory. In order to ensure maximum germination, Evanthia offers seed technology, both for small and large batches.
