ALSTROEMERIA 2019

driven by
passion

"The plant has thick leaves and compact flowers on each stem. Modest at first, until the flowers start to bloom. The world of pure beauty that comes from within, is a sheer triumph."

ALSTROEMERIA: FROM THE ANDES TO WORLDWIDE CULTIVATION

It could have been the description written by the Swedish botanist Clas Alströmer. In 1762 he sent the seeds of this plant to his professor, Carl Linnaeus, who started working with the plant. Later, Linnaeus named the Alstroemeria after his student.

From low shrubs originating from the cold Andes, the Alstroemeria, or Inca Lily, has been transformed into

an elegant cut flower that can be grown all over the world. Royal Van Zanten has their own 30 stunning varieties.

Selection is the art of knowing what to keep

The Alstroemeria must tick a lot of boxes before it can become part of Royal Van Zanten's collection.

The colour of the flowers is leading, but high

production and temperature- and virus tolerance are just as important. Selection is the art of knowing what to keep; we select and test flowers thoroughly in order to develop a commercially successful variety. In this brochure, we are pleased to introduce you to our Alstroemeria varieties that have reached the status of 'world class variety'.
