THE WINNING FLOWERS

Let's fast-forward to time when this pandemic is behind us and imagine a change in consumer habits. Horticulture and plants are going to come out of this uncertain period, during which the **benefits of nature** have become apparent to everyone, as the winners.

Our breeding aims to facilitate the work of professionals; and Morel Cyclamen bring pleasure and joy to those who buy them or receive them as a gift. Attentive to your needs and available to offer support whatever difficulties you may be experiencing, we guarantee that we are totally dedicated to **adapting** our **extensive offer** to meet your needs and suit the requirements of your climate.

This season, we are delighted to offer you thirteen new varieties. 2021/2022 marks a turning point with the arrival of two new **very sturdy red Halios®**, including the 2012 Scarlet red evolution, with its volume increased.

Amongst our other new introductions, the Midi+® and INDIKA® series are of particular interest for their exceptional characteristics in terms of homogeneity and resistance outdoors. Metis® is available in two new colours, and the SUCCESS®, CURLY® and Very Special ranges also boast exciting new discoveries.

May we take this opportunity to thank you for your loyalty, we want to share our **faith** in a new horticultural era with you, an era of meaningful values.

We wish you a productive season and beautiful cyclamen crops.

Olivier Morel, Chairman

13 NOVELTIES

Metis®

Ø 9/12 cm (3.5-5'')

Bright purple / Violet vif

4092

- Plant habit rounder than 4090 Purple
- Colour remains bright and vibrant
- Many small, dark leaves
- Recommended for flowering season with ADT < 20°C/68°F

Salmon Bright purple Magenta

Metis®

Ø 9/12 cm (3.5-5'')

Edge mix / Mélange Liseré

4911

- Different from 4910 Flamed mix
- Intense colours enhanced by a fine white edge (no flame effect)
- Improved growth and size uniformity between colours
- 3 colours with edge: salmon, magenta and bright purple
- Good plant structure, rounder with more leaves

Midi+®

Ø 10,5/15 cm (4-6'')

Rose with eye / Rose à œil

5060

- OUTstanding Cyclamen® performance
- Attractive from a distance in flowerbeds
- Complementary colour which brights up the Midi+® series

Bright purple / Violet vif

5092

- OUTstanding Cyclamen® performance
- Bright colour, stays vibrant even outdoors at low temperatures
- Perfect homogeneity with other colours in the series

INDIAKA® mix
Mélange INDIAKA®

53950

Ø 10,5/15 cm (4-6'')

- OUTstanding Cyclamen® performance
- Early and synchronised flowering across the 4 colours thanks to the addition of INDIAKA® Bright purple exp. and INDIAKA® Magenta exp.
- Excellent uniformity of plant size
- Enables easy and quick sale of the batch
- 20% Salmon + 20% Rose + 30% Bright purple + 30% Magenta

Latinia®

SUCCESS®

Ø 10,5/15 cm (4-6'')

SUCCESS® Light pink with eye / SUCCESS® Rose clair à œil

1062

- Complementary colour in the series
- Light pastel pink with purple eye, stark contrast
- Abundantly-flowering variety with central bouquet
- Round plant shape, even in hot growing conditions

Salmon rose evolution
Rose saumoné évolution
2053

Halios® Decora

Ø 15/22 cm (6-8.5'')

Red silverleaf evolution / Rouge décora évolution
2211

- Remarkable improvement of 2210 Red silverleaf
- Brighter colour with more contrast, leaves 100% silvery
- Centred bouquet and more abundant flowers
- Structure of the plant rounder, small leaves
- Plant more voluminous, suitable for extra-large pots
- For late flowering programs (from sowing count 1 week extra compare to 2210)

Halios®

Ø 15/22 cm (6-8.5'')

2012

- **Significant improvement** for this key colour
- Intense lasting colour
- Highly recommended for its tolerance to Botrytis, even during short days
- Voluminous plant suitable for extra-large pots and late flowering programs

2053

- Improvement of 2051 Salmon rose
- Vibrant pastel shade
- Petals rounder and flatter
- Centred and abundant flowers, resistant flowers
- Round plant structure, leaves dark and marbled
- Same earliness as other varieties of Halios®

Scarlet red evolution
Rouge écarlate évolution
2012

Halios® Curly

Ø 15/22 cm
(6-8.5'')

CURLY® Deep magenta / CURLY® Magenta foncé
2505

- Improvement of 2506 CURLY® Magenta
- Colour is darker, more intense, even with high levels of light in autumn
- Sturdy plant with thick stems
- Dark leaves

CURLY® Early mix evolution
Mélange CURLY® précoce évolution
2582

- New composition with earlier varieties: new Deep magenta, Salmon exp., Indian rose exp.,
- Uniform flowering
- Compact plant habit

FALBALA® Rose evolution
FALBALA® Rose évolution
22651

Ø 12 / 17 cm (5-6.5'')

- Significant improvement of 22650 FALBALA® Rose
- Highly original flowers: 50% bell-shaped and 50% fringed or wavy
- Uniform plants, compact, round plant habit
- Improved plant structure
- Decorative foliage
- Recommended for early flowering

Very Special

Ø 9 / 10,5 cm
(3.5-4'')

BISOUS® mix
Mélange BISOUS®
69290

- Original combination of flamed flowers with silvery foliage
- Mix of fresh, attractive colours
- Very short growing time: in flower 22 weeks after sowing in northern Europe

The most generous and vigorous Midi type, a new series for multi-purpose uses

- More voluminous than Tianis[®], to grow in pots (12-14cm/5-5.5")
- Some varieties come from the previous Premium series: 5011-5041-5124-5126-5910
- Very bright colours both indoors and outdoors
- Thick stems, robust plant habit, well adapted to heat
- Also performing well for flowering in short days
- Even growth and earliness between colours
- Produces many flowers that stand out clearly above the dark foliage
- Strong impact of the colours and size of the flowers, visible from afar in the beddings
- Remarkable performance in garden and landscaping, OUTstanding Cyclamen[®], very long-lasting flowers
- The very homogenous mix is completed with 2 additional colours

STANDARD

- THE MOST GENEROUS MIDI TYPE
- High resistance to heat
- Remarkable outdoor performance

Midi+® standard colours are not available in the USA and Canada. Corresponding substitution: Dreamscape (Pan American Seed distributed through Ball).

Very Special
 MOREL CYCLAMEN

THE «VERY SPECIAL» VARIETIES ARE TRULY EXTRAORDINARY found through our research work and their unique features mean they are unclassifiable. The perfect choice for those who want to stand out from their competitors by offering rare "stand-alone" varieties, they come with their own marketing materials: a logo, label and «Best Of» factsheet.

NEW

FALBALA® - SURPRISING CYCLAMEN

- Significant improvement of 22650 FALBALA® Rose
- Highly original flowers: 50% bell-shaped and 50% fringed or wavy
- Uniform plants, compact, round plant habit
- Improved plant structure
- Decorative foliage
- Recommended for early flowering

FALBALA® Rose evolution
 FALBALA® Rose évolution

WHEN BISOUS® BECOME FLOWERS...

- Original combination of flamed flowers with silvery foliage
- Mix of fresh, attractive colours
- Very short growing time: in flower 22 weeks after sowing in northern Europe

BISOUS® mix / Mélange BISOUS®
69290

FRIOLA® - ONE OF A KIND

Large bicolor and fringed flower. Perfectly adapted for late programs and cold growing condition. Ideal for flowering at the end of the season. Excellent resistance to Botrytis. 10 % of plants with variable flower shape.

FRIOLA® Light purple

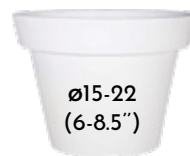

FRIOLA® Violet

22490

FRIOLA® Magenta

FRIOLA® Magenta

22506

PIPOCA® - OF A DIFFERENT NATURE

Extremely fringed flowers. Small crenellated leaves. Easy cultivation, excellent tolerance to Botrytis.

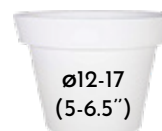

Flowering in 2 stages: rise of numerous lantern-shaped buds, with fringes of green-yellow hues. Then, opening for several weeks of fringed flowers whose yellow tint softens when blooming.

40 % Magenta, 35 % light shade tones (salmon, salmon rose, light pink with eye), 25 % bright purple.

PIPOCA® mix

PIPOCA® Mélange

12590

LILIBELLE® - DOUBLY ORIGINAL

- Combining FANTASIA® and VICTORIA flower on the same petal
- Very centered bouquet, extremely dark foliage
- Excellent contrast foliage/flowers
- 10 % of the plants FANTASIA® type and 5 % VICTORIA type

LILIBELLE® Magenta

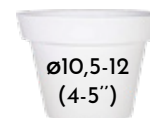

LILIBELLE® Magenta

44705

LILIBELLE® Bright purple

LILIBELLE® Violet

44790

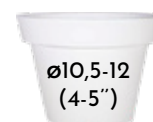

ORIGAMI® - A STAND-ALONE CREATION

100% ORIGAMI® type flowers, very different from a usual cyclamen. Very resistant, excellent hold, even outdoors. For late crops (December - March) with short days, its petals grow bigger and reveal the distinctive VICTORIA characteristics.

ORIGAMI® silverleaf

ORIGAMI® décora

OUTstanding Cyclamen®

THE LABEL FOR THE BEST OUTDOOR VARIETIES

Each year, our varieties are rigorously tested for their outdoor performance. These "top of the top" varieties are to be preferred in more difficult climatic conditions, such as Northern Europe climate type. This selection brings you the guarantee of a lasting and aesthetic flowering in balcony, terrace and garden.

Note that not all varieties have been tested, especially in the Smartiz®, Midi + ® and Latinia® series, which have already demonstrated their excellent outdoor performance for a long time in Mediterranean or Californian climates types.

Five new varieties tested and approved this year:

Smartiz® 6395 FANTASIA® Purple

Metis® 4092 Bright purple,

Midi+® 53950 INDIKA® mix,

Midi+® 5060 Rose with eye,

Midi+® 5092 Bright purple.

Find the 64 OUTstanding Cyclamen® references in the variety list on pages 86-87.

To obtain the label, a minimum score of 7/10 is required.

Tested and proven using the following criteria:

- Good lifespan and more particularly the vigour of the plants. The resistance to hydric stress or variation of temperatures
- Average number of flowers per plant
- Quality and lifespan of the foliage
- Uniformity of plants behavior per group
- Combined appreciation of the multi criteria

TECHNICAL PAGES INFORMATION GUIDE

TO PROGRAM A SUCCESSFUL CULTURE

3 INTERDEPENDENT PARAMETERS

VARIETY CHOICE

The sales calendar allows you to choose from the very wide offer, and vice versa.

VARIETY CHOICE

AVERAGE DAILY TEMPERATURE (ADT)

The key factor to improve quality and shelf life: Set the lowest possible ADT in greenhouses during the flowering period!

As a bonus: energy savings ...

POT DIAMETER

Optimizing the cultivation area with recommended density and the choice of three pot sizes per range.

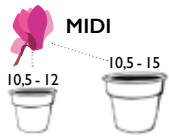

USE THE GROWING DATA IN 3 STEPS:

- a) Start from the crop duration of a variety
- b) Count backwards from the planned flowering date,
- c) Obtain the week of sowing and / or that of potting.

CULTURE INFORMATION

Flower size - Pot size MINI		Advised ADT (a) at flowering stage in greenhouse				DENSITY plants/m ²	CULTURE TIME

	 15					14			

Legend : (a) : ADT flowering stage : Average Daily Temperature in the greenhouse during the flowering stage.
 (b) : Please note for a flowering in spring it may be necessary to add artificial light during vegetative growth.
 (c) : Flower removal recommended.
 (d) : Plug size 15-20 mm (age 12 weeks) – Plug size 20-35 mm (age 14 weeks) – Plug size >35 mm (age 16 weeks).
 (e) : During short days, the VICTORIA characteristics can be insufficiently marked.

12° ~ 15° C	Cold culture conditions to obtain plants of small volume or to help to reduce the transpiration of the plants of big volume. Control the relative humidity percentage. These temperatures require varieties with low sensitivity to Botrytis.
15° ~ 20° C	Cool culture conditions, ideal for most of the varieties.
20° ~ 25° C	Warm culture conditions to obtain plants with a larger volume than normal. Choosing a bigger pot can improve the lifespan of the plants.

Halios® VICTORIA <i>The VICTORIA characteristics are more pronounced when days are long 50 % VICTORIA Flower</i>						14	30 ~ 32 weeks	14 ~ 16 weeks	
						12			
						6			34 ~ 36 weeks

12° ~ 15° C

Cold culture conditions to obtain plants of small volume or to help to reduce the transpiration of the plants of big volume. Control the relative humidity percentage. These temperatures require varieties with low sensitivity to Botrytis.

15° ~ 20° C

Cool culture conditions, ideal for most of the varieties.

20° ~ 25° C

Warm culture conditions to obtain plants with a larger volume than normal. Choosing a bigger pot can improve the lifespan of the plants.

Not advised	Possible	Optimal

CULTURE INFORMATION

Flower size - Pot size		Advised ADT (a) at flowering stage in greenhouse				DENSITY plants/m ²	CULTURE TIME	
VARIETIES	Pot Ø cm	 20° ~ 25°C	 15° ~ 20°C	 12° ~ 15°C	 15° ~ 20°C		From sowing	From plug size > 35 mm (d)

	 22(c)					3	42 ~ 44 weeks	26 ~ 28 weeks

Legend : (a) : ADT flowering stage : Average Daily Temperature in the greenhouse during the flowering stage.
 (b) : Please note for a flowering in spring it may be necessary to add artificial light during vegetative growth.
 (c) : Flower removal recommended.
 (d) : Plug size 15-20 mm (age 12 weeks) – Plug size 20-35 mm (age 14 weeks) – Plug size >35 mm (age 16 weeks).
 (e) : During short days, the VICTORIA characteristics can be insufficiently marked.

These growing durations are observed in Fréjus (France) with the growing techniques described on www.cyclamen.com.

Feel free to contact us for the adjustments to make in your growing schedule according to your localisation.

These growing durations are given for indication only. They correspond to 80% of blooming plants with 3 opened flowers for varieties with MAXI flowers and 80 % of blooming plants with 5 opened flowers for MINI and MIDI varieties.
